

NH Coastal Viewer Layer List

February 24, 2017

The NH Coastal Viewer presents data from map services published by a number of organizations, including NH GRANIT as well as various state and federal agencies. The following symbols are used to identify the organization publishing and maintaining each service:

-  NH GRANIT, University of New Hampshire
-  New Hampshire Department of Environmental Services
-  US National Oceanic and Atmospheric Administration
-  US Park Service
- Bing and Esri

Please note that the availability and functionality of each service is the responsibility of the publishing organization.

Data Notes:

1. The Coastal Viewer focuses on the coastal watershed of New Hampshire. Some data sets may extend beyond the watershed, while others are restricted to just the watershed geography. If you are interested in mapping regions beyond coastal NH, please visit [GRANITView](#) – a statewide mapping site maintained by GRANIT.
2. Tip: to quickly find a specific layer from this list in the Viewer, click “Filter ...” at the lower right of the Layer List and begin typing a layer name in the text box. A subset of layers matching your text (from within the selected Theme) will be displayed.

The following list presents the organizational layout and layers available in the NH Coastal Viewer.
