

FOREST TYPE: SILVER MAPLE

SPECIES LIST

Asterisk denotes Species of Greatest Conservation Need. Hyperlinks take you to recommendations specific to the species.

Reptiles and Amphibians

Marbled salamander	Ribbon snake
Jefferson's salamander	Eastern hognose snake
Northern slimy salamander	Northern ringneck snake
Northern redbelly snake	

Birds

Great blue heron	Yellow-throated vireo
Green heron	Warbling vireo
Wood duck	Blue jay
Common goldeneye	Tree swallow
Hooded merganser	Black-crowned chickadee
Common merganser	Carolina wren
Red-shouldered hawk	Winter wren
Broad-winged hawk *	Blue-gray gnatcatcher
American woodcock *	Gray catbird
Eastern screech owl	Cedar waxwing
Barred owl	Yellow warbler
Northern saw whet owl	Chestnut-sided warbler
Ruby-throated hummingbird	Mourning warbler *
Red-headed woodpecker	Hooded warbler
Red-bellied woodpecker	Canada warbler *
Downy woodpecker	American redstart
Hairy woodpecker	Common yellowthroat
Pileated woodpecker	Song sparrow
Alder flycatcher *	Northern cardinal
Least flycatcher	Common grackle
White-eyed vireo *	American goldfinch

Mammals

Virginia opossum	Tri-colored bat *
Indiana bat *	Woodland jumping mouse
Northern long-eared bat *	New England cottontail *
Little brown bat *	Red fox
Red bat *	Gray fox
Hoary bat *	Raccoon
Silver-haired bat *	Mink

RECOMMENDATIONS

These recommendations are designed to optimize wildlife habitat conditions within this forest type. Other silvicultural options may apply, but they won't necessarily optimize potential habitat conditions for the full range of wildlife species that can occupy this type.

- Use uneven-aged management—single tree selection favoring larger trees to leave (i.e. a higher Q-factor).
- Avoid entry during nesting season—April to June.
